DUFADIGEST POWDER

Composition:
Contains per g powder:
- Calcium propionate .................. 300 mg
- Sodium propionate .................. 500 mg
- Gentian root powder ............... 25 mg
- Sodium molybdate dihydrate ....... 125 mcg
- Copper sulphate .....................
- pentahydrate ......................... 600 mcg
- Cobalt sulphate ..................... 600 mcg
- Iron sulphate heptahydrate ....... 600 mcg
- Manganese sulphate .................
- monohydrate ......................... 300 mcg
- Zinc sulphate monohydrate ........ 200 mcg
- Sodium molybdate dihydrate ....... 125 mcg
- Manganese sulphate .................
- monohydrate ......................... 300 mcg
- Sodium chloride ..................... 167.6 mg

Indications:
Treatment and prevention of digestive dysfunction in sheep, goats, cattle, swine and poultry. Disorders due to change in feed, feed intoxication, ketosis or indigestion in general. Dehydration/electrolyte losses as a result of e.g. diarrhoea.

Contraindications:
None.

Dosage and administration:
For oral administration in drinking water.

Piglets .................. 20 g per 1 litre of water per 40 kg body weight in addition to normal rations
Poultry .................. 200 g per 200-400 litres of water per day, for 3-5 days
Sheep and goats .................. 10 g per litre of lukewarm water, 4 times a day
Calves (~40 kg body weight) ........ 20 g per litre of lukewarm water, 4 times a day
Feedlot cattle upon arrival: administer only water with Dufadigest Powder on the first day (1000 g per 20 litres of water), followed by seven days of 1.5 litres of drinking water with Dufadigest Powder in addition to normal rations twice a day.

Once dissolved, Dufadigest Powder should be used immediately and refreshed every 24 hours for the duration of the treatment.

Withdrawal times:
None.

Storage conditions:
Store dark, dry and below 25°C. Do not freeze.

Packing:
100 g sachets and 1 kg jars.
