DUFALBEN 10% ORAL SUSP

Composition:
Contains per ml suspension:
Albendazole ................................................. 100 mg

Description:
Effective broad spectrum anthelmintic, for the control of roundworms, tapeworms, and flukes of domestic animals.

Indications:
Endoparasitic infections in cattle, sheep and goats, caused by parasites susceptible to albendazole.

Larval and adult stages of Haemonchus, Ostertagia, Trichostrongylus, Nematodirus, Cooperia, Bunostomum; adult stages of Oesophagostomum, Chabertia and Strongyloides, Dictyocaulus spp (lungworm), Moniezia spp (tapeworm) and Fasciola hepatica (adult liver fluke).

Contraindications:
Hypersensitivity to albendazole or to any of the excipients. Do not administer to animals with impaired hepatic function.

Dosage and administration:
For oral administration.
Recommended general dose: 3 ml per 40 kg body weight (ca. 7.5 mg Albendazole / kg b.w.)
For control of adult liver flukes (Fasciola hepatica): 4 – 6 ml per 40 kg body weight (ca. 10-15 mg Albendazole / kg b.w.)

SHAKE WELL BEFORE USE!
The body weight of animals should be determined with accuracy.

Precautions and warnings:
Avoid administration during early pregnancy (first 45 days).
Dose accurately to prevent development of resistance caused by underdosing.

Withdrawal times:
Meat: 12 days
Milk: 4 days

Storage conditions:
Store below 25°C. Do not freeze.

Packing:
1 litre cans.
