DUFAMEC 1% INJ

Composition:
Contains per ml solution:
Ivermectin ......................................................... 10 mg

Description:
Dufamec 1% is an injectable solution containing ivermectin, an antiparasitic agent with activity against many endo- and ectoparasites.

Indications:
Endo- and ectoparasitic infections in cattle, sheep, swine, dogs and cats, caused by parasites susceptible to ivermectin.
Cattle: Gastrointestinal nematodes, lungworms, eye worms, warbles, mites and lice.
Sheep: Psoroptic mange (sheep scab), gastrointestinal nematodes, lungworms and nasal bots.
Swine: Gastrointestinal nematodes, lungworms, lice and mange mites.
Dogs: Gastrointestinal nematodes, infective-stage heartworms, microfilariae, arthropods and ear mites.
Cats: Gastrointestinal nematodes and lungworms.

Contraindications:
Hypersensitivity to ivermectine. Do not use in dog breeds with genetic sensibility to ivermectin (Old English Sheepdog, German Shepherd, Collie) or in other animal species as severe reactions may occur.

Dosage and administration:
For subcutaneous administration.
Recommended dose: 0.2 mg ivermectin per kg, swine 0.3 mg ivermectin per kg body weight.
Cattle ........................................ 1 ml per 50 kg body weight
Sheep ........................................ 0.5 ml per 25 kg body weight
Swine........................................ 1 ml per 33 kg body weight
Dogs and cats ...................... 0.1 ml per 5 kg body weight
Dose accurately to prevent development of resistance caused by underdosing.

Withdrawal times:
Meat: 21 days (cattle and sheep)
28 days (swine).
Do not use in cows producing milk for human consumption.
Do not use in non-lactating dairy cows within 28 days prior to calving.

Storage conditions:
Store dark and below 25°C. Do not freeze.

Packing:
50 ml and 500 ml vials.
