**DUFAMEC-N 5/250 INJ**

**Composition:**
Contains per ml solution:
5 mg Ivermectin and 250 mg Nitroxinil.

**Description:**
Dufamec-N is an injectable solution containing ivermectin and nitroxinil. Ivermectin is an antiparasitic agent with activity against many endo- and ectoparasites. Nitroxinil is a fasciocide, which is effective against fasciola hepatica and fasciola gigantica infestations, and has some activity against gastrointestinal nematodes such as Haemonchus contortus and hookworms.

**Indications:**
Endo- and ectoparasitic infections in cattle and sheep, caused by parasites susceptible to ivermectin and nitroxinil.

Cattle: Gastrointestinal nematodes, lungworms, liver flukes, eye worms, warbles, mites and lice.
Sheep: Gastrointestinal nematodes, lungworms, liver flukes, nasal bots and psoroptic mange.

**Dosage and administration:**
For subcutaneous administration.
General dosage: 0.2 mg ivermectin per kg bodyweight and 10 mg nitroxinil per kg bodyweight.
1 ml Dufamec-N per 25 kg bodyweight.

**Side effects:**
Injection site reactions.

**Precautions and warnings:**
Dose accurately to prevent development of resistance caused by underdosing.
Avoid using alongside other medications. Nitroxinil stains, avoid spilling.

**Withdrawal times:**
Meat: 30 days
Do not use in cows producing milk for human consumption.
Do not use in non-lactating dairy cows within 28 days prior to calving.

**Storage conditions:**
Store dark and below 25°C. Do not freeze.

**Packing:**
100 ml vial.
