DUFAMOX 15% LA INJ

Composition:
Contains per ml oily suspension:
Amoxicillin (as trihydrate) ....................... 150 mg

Description:
Amoxicillin is broad spectrum semi-synthetic penicillin with bactericidal activity against a wide range of gram-positive and gram-negative bacteria including the following:
Gram-negative: Actinobacillus lignieresi; Bordetella bronchiseptica, Escherichia coli (non β-lactamase producing strains), Corynebacterium spp.; Fusobacterium spp.; Haemophilus spp.; Moraxella spp.; Pasteurella spp.; Proteus mirabilis (non β-lactamase producing strains); Salmonella spp.
Gram-positive: Bacillus anthracis; Clostridium spp.; Erysipelothrix rhusiopathiae; streptococci; staphylococci (non β-lactamase producing strains).

Indications:
Bacterial infections in cattle, sheep, goats, pigs, dogs and cats caused by microorganisms susceptible to amoxicillin.

Contraindications:
Hypersensitivity to penicillins.

Dosage and administration:
For intramuscular injection in cattle, sheep, goats and pigs.
For subcutaneous injection in dogs and cats.
Recommended dose .................... 1 ml per 10 kg
If required, repeat after 2 days.
Shake well before use and always administer aseptically. The dose volume should not exceed 20 ml in cattle, 10 ml in swine, 5 ml in sheep and goats at any one injection side.

Side effects:
Use of the product may occasionally result in local tissue reaction.

Precautions and warnings:
Therapy should be based on susceptibility testing or local epidemiological information. Do not handle the product if you are known to be hypersensitive to penicillins.

Withdrawal times:
Meat: 14 days
Milk: 3 days
Storage conditions:
Store dark and below 25°C. Do not freeze.
After first opening it should be stored dark and refrigerated conditions (2 – 8°C)

Packing:
100 ml vials.
