TRIM/SUL M 40/200 INJ

Composition:
Contains per ml solution:
Trimethoprim ........................................... 40 mg
Sulfamethoxazole ................................. 200 mg

Description:
Trimethoprim is an antibacterial agent with a bacteriostatic activity against many gram-negative and gram-positive bacteria. Sulfamethoxazole is a sulfonamide antibiotic with bacteriostatic activity. The combination (‘potentiated sulphas’) is bactericidal against a wide variety of gram-positive and gram-negative bacteria as trimethoprim and sulfamethoxazole work synergistically.

Indications:
Infections in cattle, swine, sheep, goats and horses caused by microorganisms susceptible to the combined effects of trimethoprim and sulfamethoxazole, such as acute or chronic enteritis caused by Salmonella choleraesuis and some other Salmonella spp.; post-weaning diarrhoea caused by K88-positive, K99-positive or 987P Escherichia coli-strains; secondary bacterial infections with Pasteurella multocida, Actinobacillus pleuropneumoniae, Streptococcus spp and Haemophilus parasuis, during the course of viral disease.

Contraindications:
Hypersensitivity to trimethoprim or sulphonamides, blood dyscrasias or severe hepatic or renal impairment.

Dosage and administration:
For intramuscular (cattle, swine, sheep, goats) or slow intravenous (cattle, horse) administration. Recommended dose .......... 1 ml per 20 kg body weight twice daily for up to 5 days
To avoid under dosing the body weight should be determined with accuracy.

Side effects:
Transient injection site reactions. Anaemia, leucopenia and thrombocytopenia can be observed.

Interactions:
Do not administer concurrently with members of the Vitamin B complex, or local anaesthetics such as procaine and lidocaine or calcium based solutions.

Withdrawal times:
Meat: 14 days, Milk: 4 days

Storage conditions:
Store dark and below 25°C. Do not freeze.
After first opening it should be stored in dark and refrigerated conditions (2 – 8°C).

Packing: 100 ml vials.
