Description:

An adequate supply of vitamins and minerals is essential to build lean muscle mass, to improve health of joints, skin, coat and the immune system, and to enhance strength, energy and fertility in performance dogs as well as family pets.

Directions for use

The following daily dose is recommended:

Puppies and small dogs (≤ 20 kg) $\frac{1}{2}$ tablet

Large dogs (> 20 kg) 1 tablet

The tablets may be administered directly to the animal or crushed and mixed with feed.

Pups, pregnant bitches, dogs fed a homemade diet, geriatric dogs and dogs convalescing after illness or surgery require additional nutrients. For these, double the normally recommended daily dose.

Storage conditions:

Store below 25°C in a dark, dry place.

Packing:

Jars containing 200 tablets.
